A diagram illustrating the flow of data. On the left, several small squares and rectangles represent input data. These inputs feed into a central trapezoidal shape, which represents a processing unit. From the right side of this unit, multiple lines radiate outwards, connecting to a laptop on the right. The laptop screen displays a bar chart with five bars of varying heights and a line graph with four data points connected by lines. An arrow points from the top right corner of the laptop screen towards the top right corner of the overall diagram.

Step 3

Name, review, and create

☒ AWS service

Allow AWS services like EC2, Lambda, or others to perform actions in this account.

☐ AWS account

Allow entities in other AWS accounts belonging to you or a 3rd party to perform actions in this account.

☐ Web identity

Allows users federated by the specified external web identity provider to assume this role to perform actions in this account.

☐ SAML 2.0 federation

Allow users federated with SAML 2.0 from a corporate directory to perform actions in this account.

☐ Custom trust policy

Create a custom trust policy to enable others to perform actions in this account.

Use case

Allow an AWS service like EC2, Lambda, or others to perform actions in this account.

Common use cases

☒ EC2

Allows EC2 instances to call AWS services on your behalf.

☐ Lambda

Allows Lambda functions to call AWS services on your behalf.
